

Give your service team a break!

New range of all solid-state, RF power amplifiers for particle accelerators
Rugged, cost-competitive systems based on the latest LDMOS technology

Built to last.

- Ruggedness: 100% reflected power handling
- Modularity: Simple to service, low ongoing costs and maintenance requirements
- Redundancy: True inbuilt redundancy available allowing full power operation under partial failure
- Reliability: Extensive protection and monitoring features
- Safety: No HV power supplies
- Performance: Linear, high efficiency technology

Fixed frequency and broadband systems up to 850MHz, pulsed and CW, output power to several hundred kW

L-band & S-band systems to be released soon
